## Intermediate/Advanced Microlight Pilot Certification Syllabus and Standards/Biennial Flight Review

Name:  Cert No:

Microlight Type:  Reg:

Test:  Intermediate  Advanced  Passenger Rating  Biennial Flight Review

(Circle as applicable)

**EXAMINER TO GRADE RESULT:** 10 Excellent (Pass) 9 Above Average (Pass) 8 Average (Pass) 7 Competent (Pass) 1 – 6 (Training Required)

General Knowledge Section (Written)	Result	Piloting Section	Result
Aircraft documents		Pre-flight inspection	
Aircraft loading (C of G)		Aircraft ground handling	
Meteorological knowledge		Cockpit checks	
Turbulence cause and effects		Engine and throttle handling	
Knowledge of spin recovery		Climb out and approach angle	
Basic technical aptitude		Circuits / circuit rejoins / overshoots	
Flight planning knowledge		Engine failure after take-off	
Regulatory knowledge		Minimum height loss stall	
<b>Rotorcraft Only</b>		Wing drop stall and recovery	
P.I.O recognition and recovery		Medium & Steep turns	
Operations behind power curve		Take-off - normal / short field	
Minimum speed level flight		Landings – normal / glide / precision	
<b>Powered Parachutes Only</b>		Forced landing – without power	
Steering riser failure		Precautionary landing procedure	
Canopy non-inflation on take-off		Traffic awareness and lookout	
Canopy collapse		Basic Airmanship and Attitude	

Overall recommendation:  Pass  Re Test (delete as applicable) Date:
